

Question No. 1

Which of the following statements are correct about free goods?

More than one correct answer is correct. Answer True or False

- True
- False

It is possible to automatically record inclusive bonus quantities of an item on one line in sales documents

- True
- False

To activate one-line inclusive bonus quantities, you must set a flag on the free goods master record

- True
- False

The condition technique is used in free goods

- True
- False

When you enter an exclusive bonus quantity, an extra line appears where you can enter the same ordered material

- True
- False

Once partial deliveries have been shipped, you cannot change any quantity or dates in the order. If data changes, the order item has to be rejected and re-entered

Which of these statements are correct?

More than one correct answer is correct. Answer True or False

True

False

The availability check is always carried out in the order.

True

False

The indicator for controlling complete/partial deliveries is set from the customer master record. It can be manually changed during sales order entry.

True

False

Inward and outward movements in the stock are taken into account in the availability check.

True

False

In each case the replenishment lead time is always taken into account.

True

False

The indicator used for processing complete and partial deliveries can be changed manually in sales order entry.

Question No. 13

What is in the incompleteness procedure and where is it assigned?

More than one correct answer is correct. Answer True or False

True
 False

The incompleteness procedure allows you to control whether incomplete sales documents can be saved, for each sales document category.

True
 False

Incompleteness procedures can be set up and assigned at sales document category, item category or schedule line category level.

True
 False

Partner functions, texts and condition types in Pricing cannot be included in the incompleteness procedure.

True
 False

The incompleteness procedure specifies the effect that incomplete data in the sales documents will have on further processing.

True
 False

The incompleteness procedure contains a list of fields for orders, deliveries and billing documents. To be able to save the document, you must complete these fields.

Which of the following statements about material determination are true?

More than one correct answer is correct. Answer True or False

True

False

True

False

True

False

True

False

True

False

A material master record is not required for the material number that is being replaced

Material determination is a tool to automatically exchange materials in the sales document

In material determination, the system automatically searches for valid master records previously created in material determination

The sales document header overview contains information about the material that was originally entered as well as the reason for substitution

During order entry, the material ordered by the customer is replaced by the substitute defined in the master record

Question No. 58

Which of the following statements are correct?
